Target Audience

This activity has been designed to meet the educational needs of physicians active in the treatment of HIV.

Program Description

In this activity, an expert in the treatment of HIV will examine issues to be considered when choosing an initial antiretroviral strategy.

Educational Objectives

- Identify optimal components of initial antiretroviral regimens, based on HIV-specific as well as patient-specific factors
- Review current data on using an NNRTI-based regimen for initial antiretroviral therapy
- Review current data on using a PI-based regimen for initial antiretroviral therapy

Accreditation Statement

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of the University of Florida College of Medicine and PVI, PeerView Institute for Medical Education. The University of Florida College of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Credit Designation Statement

The University of Florida College of Medicine designates this educational activity for a maximum of 1.0 *AMA PRA Category 1 Credit(s)*[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Hardware/Software Requirements

PeerView Press requires version 6.x browsers or higher from Microsoft or Netscape. Certain activities may require additional software to view. These activities will be marked as such and will provide links to the required software. That software may be: Adobe Reader®, and Adobe® Flash Player.

Privacy Policy

PeerView Press shares your concerns about maintaining the privacy of personal information collected on the Internet. PeerView Press ensures that confidentiality of data relating to individual visitors to a medical/health web site, including their identity, is respected by this web site. The web site owners undertake to honor or exceed the legal requirements of medical/health information privacy that apply in the country and state where the web site and mirror sites are located.

Privacy Policy Changes:

Minor changes to our privacy policy may occur. If privacy policies change in a way that significantly affects the way we handle personal information, we will not use the information we have previously collected without obtaining consent. We will post all privacy policy changes on our web site in a timely manner.
